### PLEASE DESCRIBE THE TYPE OF WORK TO BE COMPLETED

(Be as detailed as possible to avoid having to provide additional information)

#### Provide a detailed description of the proposed project:

This restoration project includes stream restoration practices in the mainstem Coweeman River and tributary habitat in Turner Creek in Cowlitz County on the Home Site of the Andrews Tree Farm located in section 4, T7N, R1W and section 33, T8N, R1W. The project reach includes 1.4 miles of the Coweeman River ranging from river mile 8.2 to river mile 10, and 0.4 miles of the Turner Creek tributary from Creek mile 0.0 to 0.4. Stream restoration practices include installation of wood structures and riparian enhancements to promote habitat quantity and diversity and to address a well documented concern for stream temperature within the watershed. The proposed project compliments eight projects already implemented by the Conservation District and two additional 2011 project proposals. Project emphasis is placed on addressing the restoration needs, limiting factors, and priority life stages for fall Chinook, coho, and winter steelhead as identified in the Lower Columbia Salmon Recovery and Fish and Wildlife Subbasin Plan and 2010 Habitat Strategy.
